

TOOL MAKING

DESIGN

- CAD DESIGN
- 2D & 3D DESIGN
- CNC SIMULATION

PRODUCTION

- SHORT RUN TOOLING TO HARDENED PRODUCTION TOOLS
- CNC WIRE & SINK EDM
- CNC MILLING & TURNING

QUALITY

- CMM MACHINE
- IN HOUSE QUALITY CONTROL

Accurate, high quality Toolmaking is key to ensuring manufacturers are able to maintain modern day production demands. Employing CAD/CAM/CAE, the facilities we are partnered with are able to produce a wide range of tools, including press tools, jigs and fixtures for a range of materials, die cast tools and injection moulds. We are able to offer tooling solutions at cost effective prices. Technical proposals for tooling are submitted to the customer for review prior to any metal being cut.
